# INDEX TO VOLUME LXXIII

Accused Persons in England, Preliminary Examination of (Keedy), 103–116
Amblypoda, A contribution to the Osteology of Titanoides and the Relationships of the (Patterson), 71–101
American Philosophical Society, Lafayette and the (Nolan), 117–126
American Philosophical Society, List of Officers, 371–397
Anax (Odonata: Æshnidæ), The rates of growth, larval development and seasonal distribution of Dragonflies of the Genus (Calvert), 1–70
Avifauna, The distribution and Origin of the West Indian (Bond), 341–349

Belgrade, Turkish remains in modern (Prince), 331–340
Bond, James, The distribution and origin of the West Indian Avifauna, 341–349
Bryant, William L., The fish fauna of Beartooth Butte, Wyoming, Parts II and III, 127–167
———New fishes from the Triassic of Pennsylvania, 319–326

Calvert, Philip P., The rates of growth, larval development and seasonal distribution of Dragonflies of the Genus Anax (Odonata: Æshnidæ), 1–70
Conservation and evolution in a changing social program, by John C. Merriam, 351–370
Contribution to the Osteology of Titanoides and the Relationships of the Amblypoda, (Patterson), 71–101
Cope-Osborn theory of dental evolution, A half century of Tritubercuły, (Gregory), 169–317

Dental evolution, A half century of Tritubercuły, the Cope-Osborn theory of (Gregory), 169–317
Development and seasonal distribution of Dragonflies of the Genus Anax (Odonata: Æshnidæ), The rates of growth, larval (Calvert), 1–70
Distribution and origin of the West Indian Avifauna, by James Bond, 341–349
Dragonflies of the Genus Anax (Odonata: Æshnidæ), The rates of growth, larval Development and seasonal distribution of (Calvert), 1–70

Evolution, A Half Century of Tritubercuły, The Cope-Osborn Theory of Dental (Gregory), 169–317
Evolution in a changing social program, Conservation and (Merriam), 351–370

Fish fauna of Beartooth Butte, Wyoming, Parts II and III, by William L. Bryant, 127–167
Fishes from the Triassic of Pennsylvania, New (Bryant), 319–326

Gregory, William K., A half century of Tritubercuły, the Cope-Osborn theory of dental evolution, 169–317

Half century of Tritubercuły, the Cope-Osborn theory of dental evolution, by William K. Gregory, 169–317

Keedy, Edwin R., Preliminary examination of accused persons in England, 103–116

Lafayette and the American Philosophical Society, by J. Bennett Nolan, 117–126

Merriam, John C., Conservation and evolution in a changing social program, 351–370

New amplifications of the North American Piperaceæ, by William Trelease, 327–330
New fishes from the Triassic of Pennsylvania, by William L. Bryant, 319–326
Nolan, J. Bennett, Lafayette and the American Philosophical Society, 117–126

Odonata: Æshnidæ, The rates of growth, larval development and seasonal distribution of Dragonflies of the Genus Anax (Calvert), 1–70
Officers of the American Philosophical Society, List of, 371–397
Osteology of Titanoides and the relationships of the Amblypoda, A contribution to the (Patterson), 71–101

Patterson, Bryan, A contribution to the Osteology of Titanoides and the relationships of the Amblypoda, 71–101
Piperaceæ, New amplifications of North American (Trelease), 327–330
Preliminary examination of accused persons in England, by Edwin R. Keedy, 103–116
Prince, J. Dyneley, Turkish remains in modern Belgrade, 331–340

Rates of growth, larval development and seasonal distribution of Dragonflies of the Genus Anax (Odonata: Æshnidæ), by Philip P. Calvert, 1–70

Titanoides and the relationships of the Amblypoda, A contribution to the Osteology of (Patterson), 71–101
Trelease, William, New amplifications of North American Piperaceæ, 327–330
Triassic of Pennsylvania, New fishes from the (Bryant), 319–326
Trituberculy, the Cope-Osborn theory of dental evolution, A half century of Gregory), 169–317
Turkish remains in modern Belgrade, by J. Dyneley Prince, 331–340

West Indian Avifauna, The distribution and Origin of the (Bond), 341–349
